### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone message from Attorney Michael Cummings on July 14, 2009.

Claims 1 and 4-5 of the application have been amended as follows:

1. (currently amended) An inserter system comprising:

a plurality of modules for accumulating and assembling sheets into mail pieces;  
and

a controller computer coupled to the plurality of modules and controlling assembly of the mail pieces in accordance with predetermined instructions, the controller computer receiving status data from the plurality of modules~~[[;]]~~, the controller computer ~~including~~comprising one or more software-based data processing objects configured for processing the status data to determine inserter status, the data processing objects further configured for passing the processed status data directly to a network protocol object for transmittal, the controller computer further comprising a network port for directly transmitting the status data processed by the network protocol object to an external network, and the network port and the network protocol object ~~further~~ configured for accepting incoming requests from the external network, and the controller computer configured for transmitting inserter status data in real-time, without

need for withdrawal of information from a database or repository in the controller computer;

wherein the network protocol object is an HTTP web server object and the network port is a TCP/IP port;~~and~~

wherein the controller computer is further configured ~~[[so]]such~~ that selection of data for transmission occurs in real-time, without need for withdrawal of information from ~~[[a]]the~~ database or repository in the controller computer; ~~and~~

wherein the controller computer further comprises a processor and a memory coupled to the processor.

4. (currently amended) The inserter system of claim 1 wherein the processor of the controller computer is an embedded processor fixed within the plurality of modules.

5. (currently amended) The inserter system of claim 1 wherein the data processing objects include a parser configured to select data for transmission responsive to ~~[[an]]the~~ incoming requests ~~s~~ from the external network.

The abstract is amended as follows:

An inserter device including a plurality of modules for accumulating and assembling sheets into mail pieces. A controller computer is coupled to the plurality of modules and controls assembly of mail pieces in accordance with predetermined instructions. The controller computer receives the status data from the plurality of modules. Software based data processing objects process the inserter status data. The data processing objects pass processed status data directly to a network protocol

object. Thereby status data is available for transmittal immediately, and there is no need for storage or a repository for periodic uploading. The inserter controller computer further includes a network port for directly transmitting the status data processed by the network protocol object to an external network, such as the Internet. The network port and the network protocol object accept incoming requests from the external network[[,]] and immediately provide the requested information.

***Additional Comment Concerning Declaration***

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:  
Non-initialed and/or non-dated alterations have been made to the oath or declaration. See 37 CFR 1.52(c).

Applicant is now required to submit a substitute declaration or oath to correct the deficiencies set forth in this communication. The substitute oath or declaration must be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability" (PTO-37). Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136. Failure to timely file the substitute declaration (or oath) will result in **ABANDONMENT** of the application. The transmittal letter accompanying the declaration (or oath) should indicate the date of the "Notice of Allowance" (PTOL-85) and the application number in the upper right hand corner.

***Allowable Subject Matter***

1. In light of the decision of the Board of Patent Appeals and Interferences, dated April 1, 2009, concerning this application, claims 1 and 3-5 are allowed over the prior art of record.

2. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is Gagliardi, U.S. Patent No. 6,334,119 B1, and Tyler, Geoff, "More Snails in the Mail," Management Services, Enfield, February 2002, Vol. 46, Iss. 2, p. 22.

Gagliardi discloses:

- an inserter system;
- a plurality of modules for accumulating and assembling sheets into mail pieces;
- a controller computer coupled to the plurality of modules and controlling assembly of mail pieces in accordance with predetermined instructions, the controller computer receiving status data from the plurality of modules;
- the network port further configured for accepting incoming requests from the external network using the network protocol.

Tyler discloses transmitting real-time status data from a remote inserter system.

As per claim 1, the closest prior art of record taken either individually or in combination with other prior art of record fails to teach or suggest a controller computer coupled to the plurality of modules and controlling assembly of the mail pieces in accordance with predetermined instructions, the controller computer receiving status data from the plurality of modules, the controller computer comprising one or more

software-based data processing objects configured for processing the status data to determine inserter status, the data processing objects further configured for passing the processed status data directly to a network protocol object for transmittal, the controller computer further comprising a network port for directly transmitting the status data processed by the network protocol object to an external network, and the network port and the network protocol object configured for accepting incoming requests from the external network, and the controller computer configured for transmitting inserter status data in real-time, without need for withdrawal of information from a database or repository in the controller computer; AND wherein the controller computer is further configured such that selection of data for transmission occurs in real-time, without need for withdrawal of information from the database or repository in the controller computer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to NATHAN ERB whose telephone number is (571) 272-7606. The examiner can normally be reached on M-F 8:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Hayes can be reached on (571) 272-6708. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
